This report is part of The Career Optimism Index Study developed and conducted by the University of Phoenix Career Institute, a newly established department within the University's College of Doctoral Studies is focused on studying American workforce dynamics to inform societal solutions that spur career growth.

This specific report covers key findings across a nationally representative sample of US adults who either currently work or wish to be working and includes multiple demographic and designated metro area (DMA) data points.

OVERVIEW

- Almost one year into the pandemic, Americans' careers have been taken off course and many are living paycheck to paycheck
- Despite challenges, hope exists, and Americans are optimistic for the future
- Americans believe they are resilient, prepared, and highly employable if they had to search for a job in the short-term
- Americans define themselves by their careers. Yet, many don't see a clear path forward to develop skills and advance in their careers for the long-term
- There are acute and on-going challenges facing working adults as they navigate their careers, including but not limited to:
 - COVID-19 pandemic
 - Financial concerns
 - The future of jobs/automation
 - Emotional and structural barriers
- American workers need additional support and resources to translate their optimism into future career outcomes. They are looking for support in finding upskilling opportunities, mentorship, and access to mental health resources
